

HOSTED PBX

UNIFIED COMMUNICATIONS

Cloud-Based Communications for the Modern Office

Atlantech Online Hosted PBX service enables you to leverage our powerful, robust network and replace your legacy PBX. Never fear power outages or obsolete technology as your phone service is “in the cloud” and available 24/7 anywhere you have Internet connectivity.

Legacy phone equipment is expensive, difficult to learn for admins and leverages dying technology. Using Internet Protocol and Cloud infrastructure, you can escape the silo of the legacy phone system. And, it costs less! More functionality and flexibility at a lower cost.

Using any certified phone handset or smartphone, your business can access our hosted voice service over Atlantech Online’s dedicated circuits or Internet connectivity. Local and domestic long distance costs go away and those with multiple sites and/or remote workers can easily keep everyone on the same phone system with powerful options such as presence and instant messaging available with the click of a mouse.

With a decade of experience delivering Hosted PBX service, our trained service professionals can easily get to know your requirements, configure the system to meet your needs and get you going fast, easy and within your budget.
